

KARTHICK S

FULL STACK DEVELOPER | REACTJS | NEXTJS | TYPESCRIPT | NODEJS | POSTGRESQL

+91 82209 42384 | karthick.santhosh1999@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 3.6 years of hands-on experience building scalable, responsive, and high-performance web applications using NextJS, ReactJS, TypeScript, NodeJS, and ExpressJS. Experienced in RESTful APIs, JWT authentication, role-based access control (RBAC), PostgreSQL database operations, performance optimization, modular architecture, API integrations, and AI-driven functionality.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: ReactJS, NextJS, TailwindCSS, Redux, TanStack Query, Zod, Material UI, Shadcn UI

Backend & APIs: NodeJS, ExpressJS, Prisma, RESTful APIs, JWT, LangChain, OpenRouter, Swagger

Databases & Cloud: PostgreSQL, AWS (EC2, S3, IAM)

Testing & Tools: Vitest, Postman, VS Code, Git, GitHub

PROFESSIONAL EXPERIENCE

Full Stack Developer — Scita Solutions | Bangalore, TN | Jan 2025 – Present

- Architect and maintain core features for enterprise products, including the primary SCITA Website and ATMS (Asset, Attendance, and Application Tracking Management System).
- Design and deliver responsive, scalable interfaces using ReactJS, TailwindCSS, and Material UI, improving rendering performance across screen sizes.
- Engineered 20+ secure RESTful endpoints using NodeJS and ExpressJS, streamlining data transfer between frontend modules and PostgreSQL databases.
- Implemented authentication, authorization workflows, and fine-grained Role-Based Access Control (RBAC) using JWT to protect sensitive enterprise resources.

PROFESSIONAL PROJECTS

SciToll | Frontend Developer | Frontend Developer | ReactJS, TypeScript, TailwindCSS, NodeJS, ExpressJS, PostgreSQL

- Developed and maintained an intelligent toll management web application for real-time tracking of toll-gate devices and financial transactions.
- Built vehicle movement tracking, automated toll collection logs, plaza-level transaction reports, audit tools, and discrepancy detection.
- Implemented responsive monitoring dashboards providing real-time visibility into traffic flow and toll-gate hardware status.

ATMS (Advanced Traffic Management System) | Frontend Developer | ReactJS, JavaScript, TailwindCSS, Redux, NodeJS, ExpressJS, PostgreSQL

- Constructed high-density data visualization dashboards using ReactJS and Redux for state management.
- Built responsive, low-latency interfaces for field operators across mobile and desktop browsers.
- Integrated authentication and RBAC to safeguard critical traffic control commands; maintained clean architecture and reusable components.

PERSONAL PROJECTS

AI-Powered Expense Tracker | Full Stack Developer | NextJS, ReactJS, TypeScript, TailwindCSS, Shadcn UI, NodeJS, PostgreSQL, LangChain, OpenRouter, AI APIs

- Architected an AI-powered financial management platform for expense tracking, dynamic budgets, savings goals, and spending analysis.
- Integrated OpenRouter and LangChain AI models for personalized spending recommendations, recurring-pattern detection, and savings strategies.
- Built data visualization and CSV/PDF financial report export features with optimized API endpoints and modular frontend architecture.

EDUCATION & CERTIFICATION

B.E. — Mechanical Engineering (79%) | Latha Mathavan Engineering College, Madurai, TN | Graduated: 2021

Meta Front-End Developer Professional Certificate
